## CONTENTS

Introduction .....	page 3
<b>Chapter 1.. Incommensurate modulated phases in dielectrics with a structure of <math>\beta</math>-<math>K_2SO_4</math></b> .....	page 5...
§ 1.1 Theory of phase transitions and incommensurate phases.....	page 5
§ 1.2 Radiospectroscopic research methods Incommensurate modulated structures .....	page 16
§ 1.3 Experimental studies of compounds of the family $A_2BX_4$ type structure $\beta$ - $K_2SO_4$ .....	page 24
§ 1.4 The study of incommensurate phases in dielectric crystals at high pressure .....	page 34
<b>Chapter 2. Equipment and measurement technique.</b>	
§ 2.1 The sensitivity of the receiving sensor NQR and conditions for optimal matching of the measuring chamber .	page 40
§ 2.2 Temperature consoles to a spectrometer for studies of phase transitions .....	page 45
§ 2.3 Synthesis samples .....	page 49
§ 2.4 Apparatus for NQR studies under high hydrostatic pressure .....	page 50
<b>ChapterSequence of phase transitions in compounds <math>A_2BX_4</math> (<math>X = J</math>)</b>	
§ 3.1 Phase transitions in $Cs_2CdJ_4$ .....	page 58
§ 3.2 Study the sequence of phase transitions in $Cs_2ZnJ_4$ .....	page 61
3.3 NQR study of phase transitions in $(NH_4)_2ZnJ_4$ .....	page 76
§ 3.4 Polymorphism in the family $A_2BX_4$ .....	page 82
<b>ChapterSequence of phase transitions in <math>Rb_2ZnBr_4</math> at atmospheric and high hydrostatic pressure</b>	
4.1 The absorption spectra of $^{79,81}Br$ in the incommensurate phase at atmospheric pressure .....	page 90
§ 4.2 PT phase diagram of $Rb_2ZnBr_4$ .	page 107
§ 4.3 Features conversion spectrum near $T_C$ Comparison of diffraction data .....	page 131
§ 4.4 Discussion of the phase diagram of the model of "devil's staircase" .....	page 150
<b>MAIN RESULTS.</b> .....	page 16
Conclusion .....	page 162
References .....	page 163
